

Our declaration to have no Nuclear Power Plants

To the people living along the Seibu-line and around this area,
we appeal to you heartily.

The Fukushima Nuclear Power Plant Disaster has showed
that it was too unstable and is unable to coexist with Human beings
and the environment, including plant and animal life.

We must have our first priority to be in our lives, above everything else.

Japan is a land that is susceptible to earthquakes,
making it to be in no condition of having any Nuclear Power Plants.
In addition, we have no knowledge concerning on how to deal
with nuclear and how to clean radioactive pollution.

We appeal to you again.

We are against the re-operation and construction
of every single Nuclear Power Plant!

Let us abolish all Nuclear Power Plants!

We insist that the Government and Tokyo Electric
Power Company (TEPCO) take responsibility of
their actions and compensate the damages done
to the victims and to also guarantee their lives
and livelihoods!

We are against the exportation of
Nuclear Power Plant to other countries!

**For our precious lives,
we declare that we will create a future without
the existence of Nuclear Power Plants!**
